Company Profile

Brief introduction

Hospital & Homecare Group,established in1998,Hospital & Homecare Medical Device Co., Ltd. China, the belongingness of Hospital & Homecare I/E. Co.,Ltd.Nanjing China, a professional manufacturer mainly produce various disposable medical products,such as silicone & latex foley catheter, endotracheal tube, suction catheter, stomach tube, feeding tube, nelaton catheter, rectal tube, nasal oxygen cannula.oxygen mask.nebulizer mask,surgical gloves, and all other kinds of catheter.

We manufacture medical products that all meet international standards, including those set by the FDA,as well as CE and ISO 13485 certificate. We have an area of structure of more than 15000 square meters.We have advanced completed equipments,including injection molding machine and all kinds of tube drawing machine,which are of high quality.The company has an area of clean room at 100,000 levels of more than 1500 square meters which meets the requirements of production condition of sterile medical devices.

We promise to provide first-rate products and satisfying service to customers by adhering to a continuously-improving quality concept and standards.

For more products,pls visit http://www.aline-medical.com,the website from our headquarters.We look forward to working with you,helping patients and their familes all over the world.

Certificate CE0123 ISO13485 FDA

EC Certificate

Production Quality Assurance System

Directive 93/42/EEC on Medical Devices (MDD), Annex V (Devices in Class IIa, IIb or III)

No. G2 16 04 64660 033

Manufacturer: Hospital & Homecare IMP. & EXP. Co., Ltd. Nanjing
Room 608-611
No. 5 Zhongtai International Plaza
No.311Middle of Jiangdong Road
Central Business District
210019 Nanjing
PEOPLE'S REPUBLIC OF CHINA

EC-Representative: Shanghai International Holding Corp. GmbH (Europe)
Eiffestraße 80
20537 Hamburg
GERMANY

Product Category(ies): See Attachment

The Certification Body of TÜV SÜD Product Service GmbH declares that the aforementioned manufacturer has implemented a quality assurance system for manufacture and final inspection of the respective devices / device categories in accordance with MDD Annex V. This quality assurance system conforms to the requirements of this Directive and is subject to periodical surveillance. For marketing of class IIb and III devices an additional Annex III certificate is mandatory. See also notes overleaf.

100% Silicone Foley Catheter

HK01c HK01e HK01f HK01g

HK01c Tiemann/Coude Tip

Tiemann/Coude Tip has evenly shaped and curved rounded tid intended for male patients with enlarged prostate or those suffering from stricture.It facilitates insertion of foley catheter for male patients and helps negotiates strictures.

HK01e Dufour Tip

Dufour Tip has evenly shaped,open and angled tip with 2 sets of large. opposite and in occasion where suction is applied during continuous irrigation.It facilitates insertion in male patients and removal of significant blood clots.

HK01f Mercier Tip

The Mercier Tip comes with 2 sets of opposing eyes and a concave tip.It is used for transurethral drainage and irrigation of bladder to remove large blood clots and sediments.

HK01g Couvelaire tip

Couvelaire tip and its 2 sets of opposite large drainage eyes provides rapid and effective removal of blood clots and debris.It is suitable for newly operated patients and in situations where there are significant blood clots and sediments.

Hospital® & Homecare

100% Silicone Foley Catheter

Features:
Made of 100% medical grade silicone with superior biocompatibility.
Designed for long term catheterization,after gynecological surgeries,and in people with urethtal injury or obstruction.
Easier to Change and More hygienic.

External male catheter

HK08 External male catheter

MAIN USAGE:
Urethral catheterization drainage for male patients who suffer paralysis or uroclepsia.
DIRECTIONS:
Position over of penis then unroll the latex sleeve over entire length.
Affix distal end to drainage tubing.
Use adhesive strap around top of sleeve to penis avoiding constriction.
CAUTION:
Sterilized with ethylene oxide.
Single use only,sterile unless package is opened and damaged.
Protect from direct exposure to light.Keep in cool and dry condition.

Disposable Urethral Catheter Tray

HK09 Disposable Urethral Catheter Tray

Caution:
It’s sterilized by ETO,and designed for single use only.
Period of validity:three years;
Please check package before use;
Don’t use if package is damaged or opened;
Use this set according to the routine catheterization procedure.
Fill the balloon with sterile water;
This set is restricted to be used by medical staffs.

Contents:
Foley Catheter (Latex/Silicone)
Catheter Clamp
Plastic Forceps
PVPI Cotton Balls
Plastic Syringe with Prefilled Sterile Water
Drainage Bag
12×75mm Plastic Test Tube
Gauze Pads
Fenestrated Drape
Surgical Drape
Medical Latex Glove
Lubricant
Kidney Basin

Disposable Urethral Catheter Tray

HK09a Disposable Urethral Catheter Tray
Instruction:
Completed configuration and convenient to be used for clinical urinary drainage.
Medical blister packing is beneficial to be opened and can be sterilized thoroughly with EO residual at standard level.
Optional configuration: adult type or child type or customized according to customer's request.
Contents for adult normal configuration:

Endotracheal Tube

HK12a Nasal Preformed Tube Uncuffed

Features:
Made from non-toxic PVC.
X-Ray through the whole
tube,Nasal surgical intubation only
size ID(mm):3.0,3.5,4.0,4.5,
5.0,5.5,6.0,6.5,7.0,7.5,8.0,
8.5,9.0,9.5,10.0

HK12b Nasal Preformed Tube

High volume low pressure cuff
Special PVC blend for enhanced softness and soft atraumatic tip,nasal surgical intubation only.High volume low pressure cuff provides positive tracheal wall seal and reduces area of tracheal wall contact and minimizes capillary restriction
size ID(mm):4.0,4.5,5.0,5.5,6.0,6.5,7.0,7.5,
8.0,8.5,9.0,9.5,10.0

HK12c Nasal Preformed Tube

Low pressure cuff
Special PVC blend for enhanced softness and soft atraumatic tip,nasal surgical intubation only.low pressure cuff provides positive tracheal wall seal and reduces area of tracheal wall contact and minimizes capillary restriction
size ID(mm):4.0,4.5,5.0,5.5,6.0,6.5,7.0,7.5,
8.0,8.5,9.0,9.5,10.0

HK14a Reinforced Endotracheal Tube Uncuffed

Made from non-toxic PVC,uncuffed.
Spiral reinforcement minimizes crushing or kinking Flex conform to any patient position Especially OPS of decubitus
size ID(mm):5.0,5.5,6.0,6.5,7.0,7.5,8.0,8.5,
9.0

HK14b Reinforced Endotracheal Tube

High volume low pressure cuff Cuffed
Made from non-toxic PVC,Available with high volume low pressure cuff.
It provides positive tracheal wall seal Flex conform to any patient positions,especially to OPS of decubitus
size ID(mm):5.0,5.5,6.0,6.5,7.0,7.5,8.0,8.5,
9.0

HK14c Reinforced Endotracheal Tube

Low Profile cuff
Made from non-toxic PVC , Low profile cuff
Spiral wound stainless steel reinforcing wire inside Flex conform to any patient positions especially to OPS of decubitus
size ID(mm):5.0,5.5,6.0,6.5,7.0,7.5,8.0,8.5,9.0

虹恺医疗®

Tracheostomy Tube

Tracheostomy tube is a hollow tube,with or without a cuff,that is electively inserted directly into the trachea through a surgical incision or with a wire-guided progressive dilatation technique in case of an emergency.

Lightweight tube made of medical grade pvc for patient comfort.
Full length radio-opaque line for detection of correct placement.
ISO standard connector for universal connection to ventilation equipment.
Printed neck plate with size information for easy identification.
Straps provided in the pack for fixation of the tube.
Smooth rounded tip of the obturator reduces trauma during insertion.
High volume,low pressure cuff provides excellent sealing.
Rigid blister pack provides maximum protection for the tube.

Hospital & Homecare®

Oral pharyngeal airway

Atraumatic one piece design for optimum patient comfort and safety.
Rigid bite block to ensure airway patency.
Two sides channel design provides passage of suction catheter to clear secretions and also provides space for oral care.

HK17a

HK17a Berman type

Made from semirigid non-toxic polyethylene
color-coded
for size identification
Size:40,50,60,70,80,90,100,110mm

Made from semirigid non-toxic polyethylene
Smooth integrated design for optimum patient comfort and safety.
Color-coded bite block is designed for easy identification and to prevent biting down so that can avoid blocking airway

HK17b

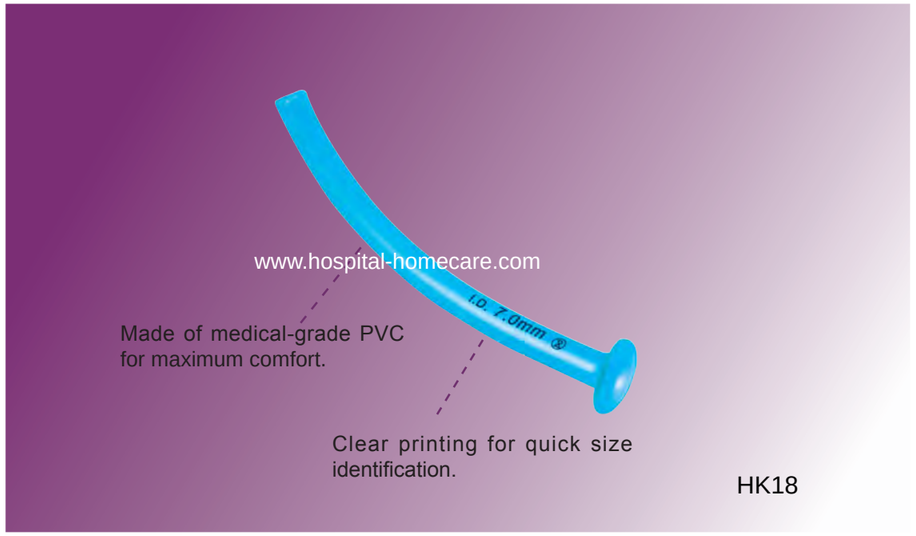

Packing of HK17

HK17b Guedel type

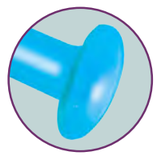

A soft flex-tip at the end of the tube,so as to insert easily
Size:40,50,60,70,80,90,100,110,120mm

Nasopharyngeal Airway

HK18 Nasopharyngeal Airway it is designed for easy insertion and maximum patient comfort,It facilitates suctioning in intensive care,general anaesthesia and also provides an alternative airway during emergency procedures.

HK18

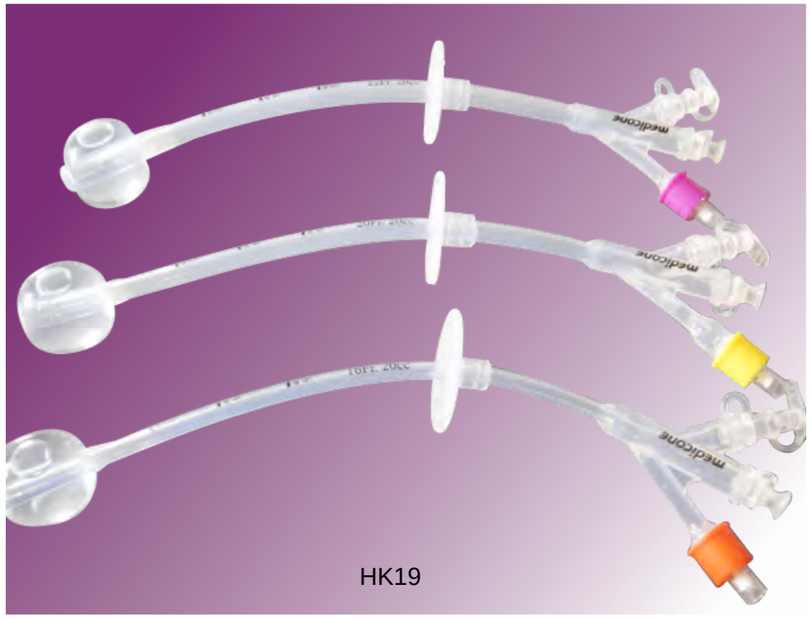

Slidable rings are designed to adjust depth of the tube for more comfort while also prevent tube from slipping the nasal airway beyond the desired depth.

Suction Flexible Yankauer Series

Suction Yankauers are designed with durability and convenience in mind. They are constructed of a clear, transparent material with a slip-resistant handle,a smooth and uniform inner surface for rapid evacuation, and a ribbed five-in-one connector for easy connection to various sizes of connecting tubing, They are available in various sizes with or without control vent bulb or flange(straight)tip and rigid or flexible design,for continuous or intermittent suction, blister packing

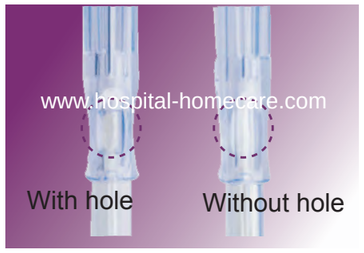

HK27

Suction Flexible Yankauer Series

Connecting tube with Yankauer handle
Made from non-toxic PVC,clear and soft,Crown tip,vented,available with connecting tube.

Tube length can be customized

Ureteral Stent Set

Can be with close or open tip.
The radiopaque line facilitate the catheter location.when visualized by X-Ray.
Lateral holes at the tube ensure much drainage and irrigation.
The catheter with good biocompatibility.
The catheter without Mucosa stimulating infection.
Sterilized package for single use only.

Mucus Extractor

HK29 Mucus Extractor is for aspiration of secretion from Oropharynx in newly born babies to ensure free respiration.

Features:
1. made of non-toxic PVC,medical grade.
2. Soft, frosted and kink resistant PVC tubing.
3. Clear transparent container permits visual examination of aspirate.
4. Spare plug cap is provided to seal the container for safe transportation of specimen to the laboratory or aseptic disposal of container.

Nebulizer with mouth piece

HK40 Nebulizer with mouth piece

Nebulizer with mouth piece
Made of Medical grade PVC
Used with any of the compressor/nebulizer for treatment of asthmatic patients.
Designed for comfortable administration of fine mists of uniform density to reach deep into lung cavity.
Simple three –picec design is easy to assemble and clean.
Break-resistant plastic provides the patient with 14 days of use with 15cm corrugated tube
With 2cm tubing
With T-piece and mouthpiece.
Packed in individual PE bag.

Nebulizer with mouth piece

Type A

HK41 Nebulizer with mouth piece

Made from non-toxic ABS and PVC.
Nebulizes at angles up to 45°to accommodate special treatment requirements.
Atomization rate 0.3ml/min,Drive flow 4 to 8 LPM.
Atomization particles <5μ.

Type
6ml Jar with mouth piece,7Ft oxygen tubing,short breathing circuit
6ml Jar with mouth piece,7Ft oxygen tubing
20ml Jar with mouth piece,7Ft oxygen tubing,short breathing circuit
20ml Jar with mouth piece,oxygen tubing

Other type is available.

Type B

HK42 Nebulizer with mouth piece

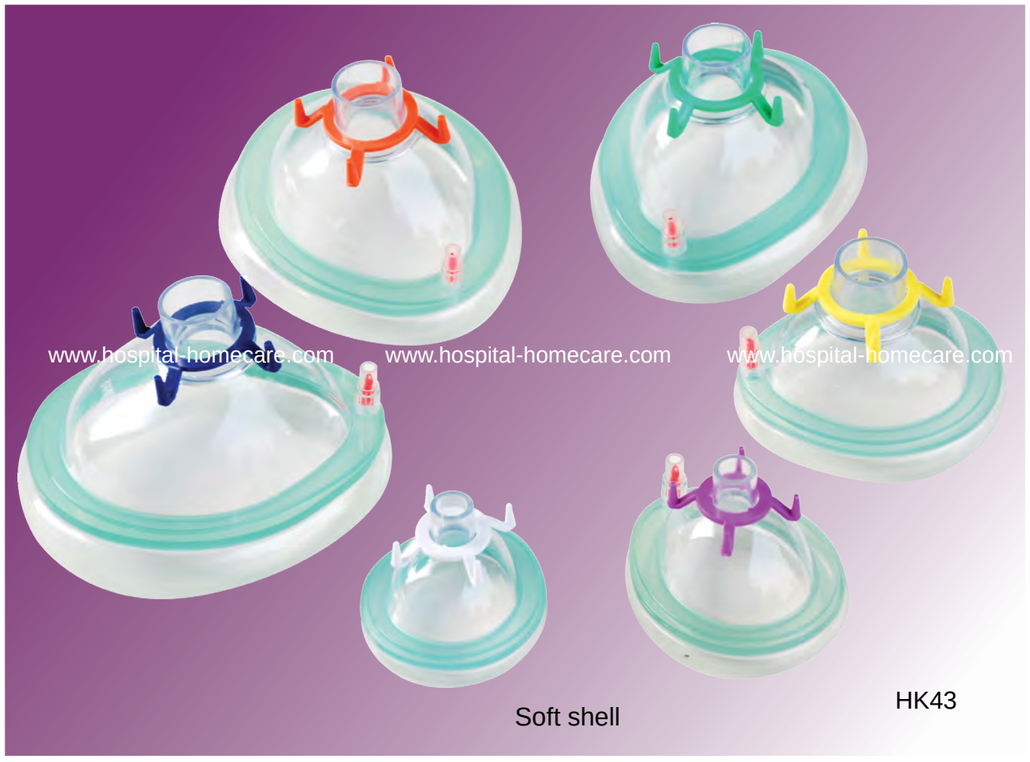

7ft Tube + 1 set Neb Jet
+ Three-way Pipe + Oral Nozzle

Anesthesia Mask

HK43 Anesthesia Mask

Features:

1.Mainly used in clinical anesthesia before induction.
2.Used in ventilation and anesthesia maintenance during the operation.
3.Use only once in order to avoid the infection between patients.
4.Reasonable curve design makes the mask adhere effectively to patients' cheek.
5.Soft shell is more conducive to fit with patient's face.

Soft shell

HK43

Anesthesia Mask

HK44

HK44 AnesEasy Mask (PVC-Free Anesthesia Mask)

Features

Made of medical grade PP and TPE.
Overmolding process.
Color-coding for easy selection.
Non-toxic, non-odor
Anatomical cushion shape provides a precise fit with patient's face.

Size	
1#	Neonate
2#	Infant
3#	Toddler
4#	Child/Small Adult
5#	Medium Adult
6#	Large Adult

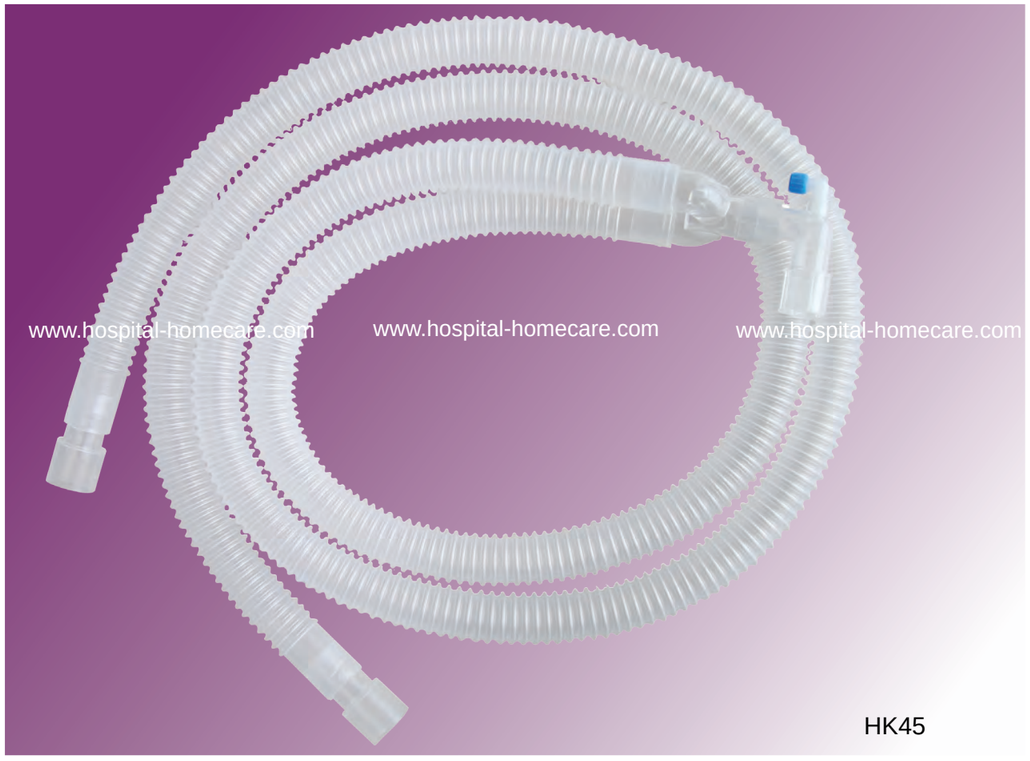

Anesthesia Breathing Circuit EVA Corrugate

HK45 Disposable Anesthesia Breathing Circuit EVA Corrugate

Features:

1.Use PE material,tube body is soft, transparent and not easy to kink.

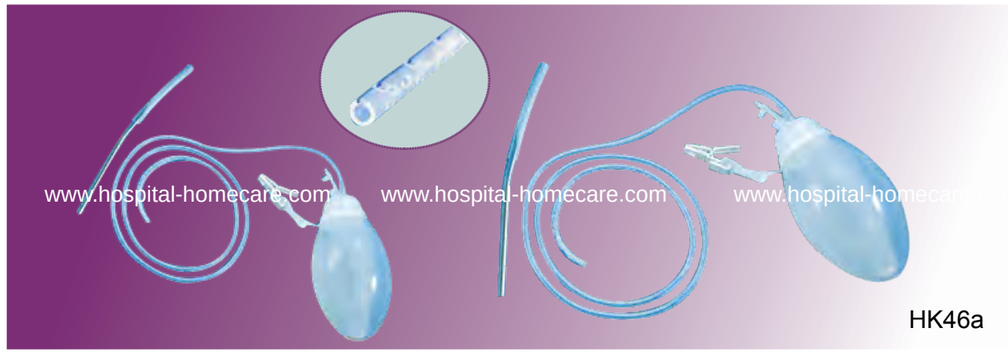

2.Use standard 1:40 soft connector,and it is secure connection and reliable sealing.

Remark

According to the client requirements,they can choose or only buy 40,80,120cm single tube,or mask,bag,artificial nose,dust filter and various connectors.

Silicone Suction Reservoir

HK46a Silicone Suction Reservoir and Flat Drain(with needle)

HK46b Silicone Suction Reservoir and Flat Drain

The character of Silicone Suction Reservoir and Flat Drain:

- The product is made of medical silicone.it is transparent
- The capacity:100ml,200ml
- Size of draining tube:F10,F16
- Supplied sterile in individual sterile blister pack
- For single use only

Disposable silicone Laryngeal Mask

HK47a Disposable silicone Laryngeal Mask

Medical grade silicone for super compatibility and patient comfort

No epiglottis bars for easy insertion of fiberoptic scope,introducers and suction catheters

Available with seven size for all patients use

HK47a

Closed Suction System
Automatic Flushing 72H (Double Swivel Elbow L-Type)

HK100

Automatic flushing closed suction system is the catheter that retracts within an isolated turbulent cleaning chamber. This reduced colonization may help reduce of VAE and VAP in your ventilated patients.

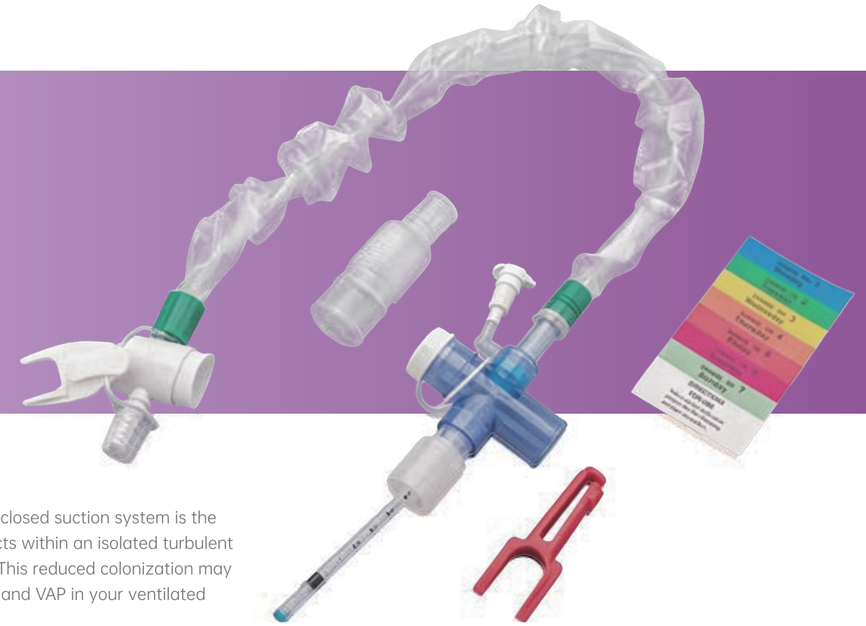

Turbulent cleaning chamber creates cleansing action, resulting in a cleaner catheter.

Hinged valve isolates catheter tip and helps prevent inadvertent lavage.

Size	Color	Tube OD	Length Of Tube

Closed Suction System Single Lumen

Closed Suction System Single Lumen 72H
(Double Swivel Elbow Y-Type & Push Switch)

HK102

Push switch and luer lock. This design can keep breathing and isolate the turbulent cleaning chamber, and prevent spray back, which reduces the risk of VAP for ventilated patients.
Prevent cross infection. The closed suction systems are designed with protective sleeve to isolate the germs inside the patients and help caregivers avoid cross infection.
The smart design of the closed suction catheters allows the patient's breath-mechanical ventilation and suctioning simultaneously.
Soft and smooth suction tip reduces damage to mucous membranes.
Double swivel connectors reduce strain on ventilator tubing.
Easy operation in suction process by being equipped with a wedge (separator) to disconnect and clip function.
